CROSS-HAWK™

High Intensity Activated Crosswalk

MODEL: Trailer

INSTALL TEMPORARY PEDESTRIAN CROSSWALKS IN MINUTES

The CROSS-HAWK enables the quick installation of temporary pedestrian crosswalks during construction projects, at events or anywhere a crosswalk is needed to increase pedestrian and motorist safety. It enables pedestrians to press a push button to activate a walk signal to safely cross the roadway. The red, yellow and flashing traffic signal indications only activate when the pedestrian button is pushed to alert and direct motorists.
