

THE CUBE

Emergency Response Signal

JOHN THOMAS INC

MODEL: Trailer

FOUR-WAY INTERSECTION CONTROL FOR EMERGENCIES

The Cube portable traffic signal provides a rapid, reliable solution for restoring traffic control during emergencies. The Cube can control an entire intersection from a single towable trailer – featuring four 4-section signal heads with one facing each direction of the intersection. Designed for rapid deployment following natural disasters and other emergencies, the Cube helps restore orderly traffic flow and improve safety.
